# MS-SGV1

ANTI-FOG & UV RESISTANT MEDICAL SAFETY GOGGLES

## OVERVIEW

MS-SGV1 protective goggles are light-weight and quality-built utilities to protect the wearer from workplace dust, grinding, fine-metal particles, chemical and other liquid splashes. Designed with durable, scratch-resistant polycarbonate lenses, the MS-SGV1 protective goggles come with an anti-fog coating, providing 99% UV protection. The goggles are also designed to fit prescription glasses inside of them while providing the wearer with an excellent field of view, safety, and comfort.

Light-weight and has a wide support area for comfort

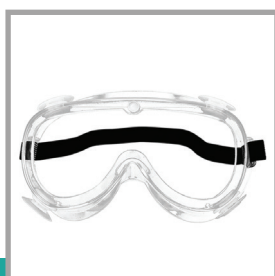

Polycarbonate lenses with high impact resistance

Anti-fog coating blocks 99% of UV radiation

Non-allergic elastic band

Ventilation valves for indirect anti-fog venting

### ANTI-FOG, SPLASH-PROOF SEALING

Protects from mist, dust, chemical and other liquid splashes.

### SPACIOUS, WIDE BODY DESIGN

Designed to fit prescription glasses inside the goggles with comfort.

## FEATURES

- Highly durable polycarbonate lenses with high impact resistance.
- Soft and wide polycarbonate casing around the rim seals the eyes completely and protects against chemical and liquid splashes.
- Curved wing shape for 180° distortion-free vision and a wider field of view.
- Anti-fog coating with 99% UV protection on the inside and extremely resistant to scratches and chemicals on the outside.
- Skin-friendly, fully adjustable non-allergic elastic headband for a snug fit.
- Designed to fit most face shapes, the goggles give an airtight seal for maximum protection.
